Designed Theme

Overall Help

Check out the Demo included in the download and open it in RapidWeaver. Or see this video for a run through:

General Settings

These should be straight forward. Options for setting up the Designed Theme:

- There's a long list of colours not on that screenshot, but you'll see how to use them
- Main content Padding is important if you don't want Edge to Edge
- The Extra Content Area appears above the Footer and that Stack can be found here: <https://stacks4stacks.com/extracontentplus/>
- The Hero Banner can be set using RapidWeaver's Site Banner setting as below:

Icon Fonts

The icons in the Icon Stack and Grid Stack are from linea.io. To reference them correctly go and download all the Icons.

Then in the Stack select the Family Name + Icon name:

To get them, you can view the Icons in their families on the page. Then to get the Icon name, look at the image name in the download.

So in this example, we would select “basic” and type “anchor” for the anchor Icon.

Other Things

Stacks

There are four Stacks included in this Theme: Button, FAQ, Icon, Grid

See the Video on how to use them and should be self-explanatory with the options in the Stacks.

H2 Lined Header

As mentioned in the video, there is a special way to get a H2 header with the line:

```
<h2><span>Hello, Title</span></h2><h3>Design it together</h3>
```

Paste that into any Text or HTML Stack and edit it for your content. Omit the H3 if not needed.

Videos

Paste in the Youtube or Vimeo code for instant responsive videos

Box 3 Gallery

Box 3 is a beautiful Gallery Stack that goes well with Designed Theme, as in the demo.

That's all folks!

Hope you like it and happy weaving!
