

29 October 2017

Launch Theme + Stack

Demo: <http://demo.yuzoolthemes.com/launch2/>

Overall

This is a Theme + Stack and both are required to run Launch.

Theme Setup

Enable the Launch 2 theme for the page

Background image

Drop in your image into the “Override Site Banner” setting to set a background image. Use any image you want from sites like unsplash.com and we recommend image size of about 1950x1250 or so.

Colours

In the theme you can set colours for the footer text and link.

Logo and Footer

To add your logo image (or not) use the General Settings in RapidWeaver. The image will be maximum 256px wide. You can also set or remove the footer text here.

Stack Setup

These should be straight forward after adding the Launch Stack to the page:

Title Settings

Enable the Title and Sub-title here along with change the text and colours.

Countdown Settings

Enable the countdown clock and change the colours, language of the *weeks* and *days* and also set the final date to countdown to (by year, month and day).

Email Sign up Settings

If you want to collect email addresses, enable this. Set the text, labels and colours and also the email address where you want the sign ups sent to. After they have been received add them to your Mailchimp or Excel launch list of contacts.

Button Hover:

Social Settings

Enable the Social icons if you want to show links to your social hangouts.

Add them one by one, changing the colour and add the username for each network individually.

Looking at our social media profile URLs for example, just add the bit in **Bold** from your account URLs to the Stack:

FACEBOOK

<https://facebook.com/pulsecms>

TWITTER

https://twitter.com/pulse_cms

GOOGLE+

<https://plus.google.com/+MichaelFrankland>

LINKEDIN

<https://www.linkedin.com/in/michaelfrankland>

INSTAGRAM

<https://instagram.com/pulsecms>

The image shows a 'Social Settings' configuration panel with a dropdown arrow on the left. It contains several sections, each with a checked checkbox and a corresponding form field for a handle and a color picker. The sections are: 'Enable Social Icons' with a black color picker; 'Enable Facebook' with a handle of 'pulsecms' and a blue color picker; 'Enable Twitter' with a handle of 'pulse_cms' and a light blue color picker; 'Enable Google+' with a handle of '+MichaelFrankland' and a red color picker; 'Enable LinkedIn' with a handle of 'michaelfrankland' and a blue color picker; and 'Enable Instagram' with a handle of 'pulsecms' and a black color picker.

That's all folks!

Hope you like it and happy weaving!
