Modal Stack

Demo: <http://demo.yuzoolthemes.com/modal/>

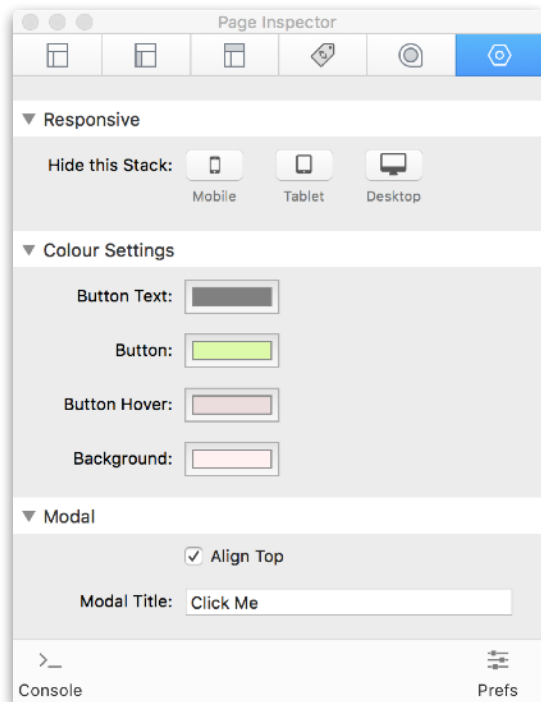

Overall Help

See this video for a run through:

General Settings

These should be straight forward. Options for setting up the Modal Stack:

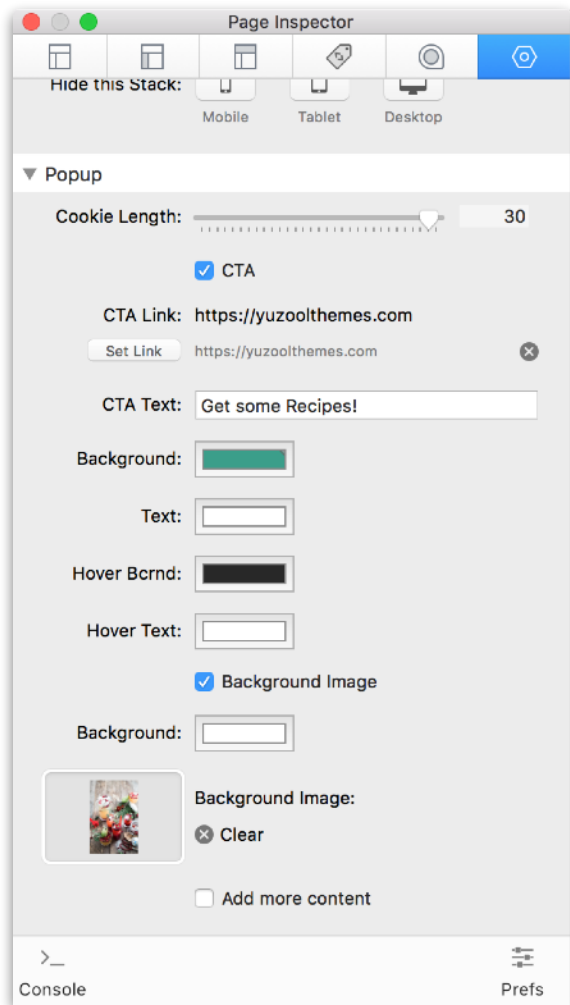

Just drop the Stack in the page, set these and then add your content to the pop up by dragging other Stacks (text, image, video etc) on top of the Modal Stack in Edit Mode.

Only thing to look out for is the “Align Top” setting. Make sure to have this on when you have Modals with lots of content in them.

Modal Pop Up

Again, set the colours for this and CTA text. This one auto pops up so there is a cookie length for how many days it will not appear again after being dismissed.

To make it easier, just drop in an image background (square 1200px x 1200px recommended) and use the CTA button. If you want to “add more content” there is an option for that but this is aimed at those striking calls to action like “sign up for newsletter”, “buy our thing” or “sale on this week!” (with coupon codes etc).

Please note this won't appear in RapidWeaver preview and will need “preview in Safari” (or other browser) to work locally. If you dismiss it and want to see it again, you'll have to clear your browser history/cache.

That's all folks!

Hope you like it and happy weaving!
